

Elegance Meets Security

www.hawaiiSTEELdoor.com

Mother & Son

The Mother and Son Series is a premium collection of Hawaii steel doors, primarily designed for main entrance applications. This series features a distinctive double-door configuration, where the larger door (the "mother") occupies 75% of the total width, and the smaller door (the "son") covers the remaining 25%. This design not only enhances aesthetic appeal but also provides functional flexibility, allowing for wider openings when required.

The Mother and Son doors are available with a variety of handle options, including fridge handles, bar handles, and standard lever handles, offering choices that blend style, convenience, and security to suit different preferences and architectural styles.

MOBH

The MOBH series features a set of equally split double doors, designed with a focus on traditional aesthetics and functionality. Both doors are of equal width and come equipped with bar handles on each side, along with a central knob handle for added convenience. This series combines timeless design with robust construction, making it a popular choice for traditional homes and grand entrances.

Glass Doors

The Glass Series features steel doors integrated with glass elements, either as attached to door or window-like sections in addition to the door. These designs not only enhance the aesthetic appeal of the space but also allow natural light to flow in, offering both elegance and functionality. Ideal for areas where additional visibility is needed, this series can also serve as a practical window-door combination, especially in entryways

Smart Lock

The Smart Lock Series features advanced locking systems integrated into our front entrance steel doors. While smart locks can be retrofitted to existing models, we also offer premium designs with built-in smart locks for seamless functionality and a sleek appearance. These models provide enhanced security, convenience, and modern technology, making them an ideal choice for customers seeking upgraded access control at their main entrance.

Twin Door

The Twin Door Series features a thin, see-through secondary door installed in front of the main steel door. This thoughtful design offers enhanced security and ventilation, allowing natural light and fresh air to enter the home while keeping the main doors open and the secondary door securely closed. It's a smart solution for those who seek both protection and comfort without compromising on openness and airflow.

BH SD Door

The SD BH series features a single steel door equipped with a sleek bar handle, offering both style and ease of use. Available in 1080 mm and 1200 mm sizes, these doors are primarily designed for main entrances, providing a clean, modern look with reliable functionality. The SD BH series combines durability, elegance, and simplicity, making it a popular choice for residential front doors.

Single Doors

The Single Door Series includes versatile steel doors designed for use as both main entrance doors and interior bedroom doors. Available in 1080 mm, 980 mm, and 880 mm sizes, these doors are part of our most budget-friendly range, offering simplicity without compromising on strength. This series comes with options for both single-lock and multi-lock systems, making it a practical and secure solution for a variety of home applications.

Luxury

The Luxury Door Series is crafted for those who seek elegance, scale, and sophistication. These doors are available in larger sizes than standard models and feature a range of royal and contemporary designs. Most models in this series come equipped with built-in smart locks for advanced security and convenience, though a few exceptions exist. Available in a variety of colours and finishes, the Luxury Series goes beyond traditional wooden textures, offering bold and modern aesthetic choices to complement upscale spaces.

Luxury Aluminium

The Luxury Aluminium Series offers the same elegant designs and premium features as our Luxury Door range but crafted from high-grade aluminium. Known for its superior durability, corrosion resistance, and longevity, aluminium makes these doors an enhanced choice for long-term performance. Combining royal aesthetics with modern strength, this series provides a sleek, low-maintenance solution that's both stylish and slightly more durable than traditional steel options.
