**WELCOME TO THE WORRY-FREE WORLD
OF JSW STEEL DOORS & WINDOWS**

WELCOME TO THE WORRY-FREE WORLD OF AVANTE.

Avante is a unique combination of the strength of steel and the warmth of wood. It stands out by exuding not only style and panache but also durability and longevity. This smart door is designed to overcome all the common threats that are associated with wooden doors like seasonal door jams, fear of fire, termites and heavy-handed installation process. Avante is not just a conventional door; it is a statement of strength and elegance that is here to ring in a new era of worry-free doors for your home.

ADVANTAGE AVANTE

Weather
proof

WEATHER PROOF DOORS
Not just a fair-weather friend. Avante doesn't shrink or swell with the changing weather. A be-all and end-all solution to your monsoon worries.

Fire
resistant

FIRE RESISTANT DOORS
You will need a furnace to bring this down. Avante stands tall in the case of fire and could give up to 2 hours of "evacuation time". A perfect solution for a stress-free exit.

Termite
proof

TERMITE PROOF DOORS
No more hollow knocks. Avante fully eliminates the possibility of a termite attack. A guaranteed fix for a termite free home.

Easy
to install

EASY TO INSTALL
No more carpenter woes. Once assembled, it is ready to install ensuring best turnaround time for both; the homeowners and the professional contractors.

Eco-friendly

ECO-FRIENDLY & SUSTAINABILITY
No trees were trimmed to construct this door. Avante is an environmental friendly steel door manufactured in a compliant facility.

SIZE: 9" X 11" (OPEN SIZE: 18" X 11")

INSIDE-OUT

- Doors are designed to be fully flushed without any joints on the surface.
- The door and the frame are provided with adequate internal reinforcement in specific areas where hardware is mounted for additional strength.
- The honeycomb infill has high crushing strength leading to impact resistance. The infill material also ensures there is no metallic noise while the doors are knocked or closed.
- The frame is made with mitered joints. It arrives in knocked down form and is assembled on-site.
- The frame is mounted on the wall opening with suitable anchor fasteners. The frame can also be filled with PUF or cement slurry (as required) to give a solid feel.

INTERNAL SUPPORT ELEMENTS

Steel reinforcements are provided internally for structural stability and integrity.

HONEYCOMB FILLING

This hexagonal infill has unique properties that enhances structural integrity and ensures minimal weight addition.

STEEL SHEETS

The steel used in the doors is galvanised, coated with primer and painted. This offers triple protection from any atmospheric interaction. They are easy to maintain, tough to the core and provide the greatest longevity.

PLAIN FINISH DOORS

- These are simple flush doors that are high on aesthetics and low on maintenance.
- Available in a range of RAL shades to suit your décor.
